

Potaman™

PU lined Potable Hoses, Double Jackets
 Designed for potable water transfer and etc. ...

Potaman is designed for potable water transfer application in compliance with American standards. This hose is recommended for American market, Asian market, South American market etc.

Potaman is a polyester double jacket style hose with a Polyurethane (PU/TPU) lining that can also handle some chemicals and petroleum based products. It can be coated with Asoe's optional Polyurethane-based Durablux™ treatment for a higher level of heat and abrasion resistance.

Application: Suitable for potable water transfer, snow-making etc.

Inner tube: Polyurethane lining
 Jacket: Double jackets, circular woven polyester jacket, plain weave or twill weave, warp yarn is made of spun polyester yarn, strips available per request

Operating Temperature Range: -60° to 176°F (-50° to 80°C) based on water

Standard Color: Blue (other colors (coated with Durablux™) available per request.

Standard Length: 50ft, 100ft; other lengths available per request;

Couplings: Stainless steel camlock couplings

Standards: Meets and exceeds NSF61, UL19, FM2111, etc.
